The Power of Your Game.™

B A S A L T X™

Originating with & refined from, selective volcanic natural material - being 100% recyclable, and an abundant natural resource, BasaltX® is then the technical end-result - exclusive to PACIFIC.

While basic basalt fibers and their usage is not something new, and while also being true that they are relatively inexpensive for those basic basalt fibers, the technical innovations exclusive to the esteemed leader in basalt fiber refinement, ASA.TEC is!

The esteemed Austrian based and worldwide leader in harvesting & producing not only the highest-grade, but also the most consistent, and quality basalt fiber - allowing only then, the process to create; BasaltX®.

Regular basalt fibers for years now, have had problems in their inconsistency and varying quality control - due to the very irregular structure of the raw basalt fiber - from being mined at various locations around the world, and then after being mined, low-quality of refinement into usable fibers.

ASA.TEC using exclusive & highly consistent Austrian volcanic material has pioneered the way with developing a basalt fiber of the highest quality - demanded by the likes of: Aviation, Aerospace, and the Automotive Industry.

- optimal combination of stiffness and flexibility in specific areas to reduce torque, and enhance power & feel
- efficient, effective reduction of shock & vibration - delivering greater playing comfort
- basalt fibers are environmentally friendly and completely recyclable! A „Mother Earth“ ecological material!
- volcanic natural material, is virtually an inexhaustible resource!

The Power of Your Game.™

RACQUET TECHNOLOGIES

SPEED++ZONE

The special developed and patented Speed Zone System delivers maximum ball acceleration combined with a high level of control.

PACIFIC.COM

The Power of Your Game.™

RACQUET TECHNOLOGIES

AIR DAMPING

The grip damping system located in the shaft minimises undesired vibrations – such as in the case of off-centre hits – and protects the arm as a result.

The Power of Your Game.™

RACQUET TECHNOLOGIES

PSS™

The Pacific Stability System gives the sides of the racquet face greater stability. This means maximum ball control, even in the case of off-centre hits. Directional control of the ball is enhanced in all situations.
